

Lindsey Wanderscheid

Title: Plant Engineer

Hired: 2007

Education: University of Minnesota – Duluth

“There’s always something going on around the campus, and ways to interact and get involved in the community.”

WHY FP&M

After seven years working for a local company, I was asked to transfer out of state. I wanted to continue in my current field, but a transfer was not part of my plans. A job at Iowa State was the answer. With great professional development opportunities, a team environment and caring employees, it was an easy decision to continue my career with Iowa State University.

FP&M TODAY

My job at Iowa State offered me better vacation and retirement. ISU matches two to one. My previous job was also very stressful, had long hours and was shift work. At Iowa State, it’s more laid-back. I have a nice balance with my family life.

There are lots of opportunities to get involved. I’m able to sit on committees, establish relationships with peers across the University with the Professional & Scientific Council, and be a part of different interdepartmental teams. Plus, the University is very open to letting you take professional development courses to reach your goals.

WHO I AM
