

WHO I AM

Title: Electrician

Hired: 2012

“I would recommend you do anything you can to work at FP&M. The benefits are great.”

WHY FP&M

After working as an electrician for a local company for 10 years I was ready for a less stressful career. In my previous job it was impossible for me to leave early and I missed out on a lot of family time. One of the biggest benefits of working for FP&M is the time off. It's been a night and day difference and much less stress.

FP&M TODAY

At FP&M you get to do something different everyday. You get to experience things you never would in the private sector and get a chance to see things you've never seen before. It's been a nice change of pace to work with people that aren't stressed out. My co-workers are helpful and welcoming. People are willing to share information and their attitudes are great.

The benefits are nice and you get opportunities you wouldn't get anywhere else. The work is manageable and the best part is at the end of the day, I get to leave work at work.
