

WHO I AM

Wade Siskow

Title: Electrician
Hired: 2013

“There’s an inherent sense of ownership that comes with working at FP&M. The work we do in electrical distribution and utilities is always on display around the ISU campus.”

WHY FP&M

Having consistency in where and when I work has been a huge benefit to my family and me. Taking time off for family matters is far less stressful than it was at my previous job, and being able to use sick leave rather than vacation time for illnesses, births or any other emergencies that may come up has been wonderful.

FP&M TODAY

I most enjoy the people I work with. On a day-to-day basis, I may work with people in a variety of areas of FP&M, not just electrical distribution, and they’ve all been great to work with. This position has also offered plenty of new learning experiences. I have always wanted to work at a place where there’s more for me to learn. There really isn’t a typical day here – and I love that!
